| Project Scheduler | Project Planner Primavera P6 | Microsoft Project | EVM | CPM | Multi-Disciplinary,
Construction & Transit Scheduling and Planning

PROFESSIONAL SUMMARY

Develop and manage integrated project schedules and baseline plans for multi-disciplinary projects, including transit and construction projects, supporting delivery across project teams and phases

Perform schedule analysis, forecasting, variance tracking, and critical path evaluation, identifying risks, delays, and performance gaps to support planning decisions

Coordinate engineering, procurement, and construction teams, aligning schedule updates and resolving sequencing constraints to maintain execution flow

Prepare and deliver weekly and monthly lookahead schedules, progress reports, and dashboards, supporting timely decision-making and mitigation planning

CERTIFICATIONS

Project Management Professional (PMP) – PMI

Engineer in Training (EIT), License No. 100602598 – Professional Engineers Ontario (PEO)

KEY HIGHLIGHTS

Improved coordination across engineering, procurement, and site teams, reducing execution gaps and enhancing consistency in project delivery across phases

Strengthened schedule adherence and planning reliability through improved WBS structure and activity sequencing

Enabled faster response to delays through enhanced critical path visibility and proactive risk identification

Managed scheduling across multiple concurrent projects, maintaining alignment between planning and field execution

TECHNICAL SKILLS

Scheduling Tools: Primavera P6, Microsoft Project

Data & Reporting: Excel, Power BI

Planning & Controls: WBS Development, Activity Sequencing, CPM, Float Analysis

Project Controls: Earned Value Management (EVM), Forecasting, Variance Analysis

Construction Planning: Resource Planning, Construction Sequencing, Site Constraints

Reporting: Lookahead Schedules, Progress Reports, Performance Dashboards

CORE COMPETENCIES

Project Scheduling & Planning

Critical Path Analysis & Schedule Optimization

Risk Identification & Mitigation Planning

Multi-Disciplinary Coordination

Schedule Performance Monitoring & Forecasting

Project Controls & Reporting

Stakeholder Communication & Collaboration

PROFESSIONAL EXPERIENCE

Project Scheduler (Remote) Marquise Co., Paris, France | November 2023 – Present

Develop and maintain baseline project schedules using Primavera P6 and Microsoft Project for multi-disciplinary projects, including transit and construction projects, managing schedules with 800–1,200+ activities across multi-phase project timelines, ensuring alignment with project milestones and delivery plans

Structure WBS and activity plans across schedules with 800–1,200+ activities for multi-disciplinary project workstreams, including transit-related workstreams, improving sequencing clarity and coordination across project teams

Monitor critical path activities and perform schedule risk analysis, enabling early identification of delays and timely mitigation actions

Conduct schedule analysis and variance tracking, identifying deviations early and supporting timely corrective actions to minimize schedule slippage and maintain project timelines

Own preparation and delivery of weekly lookahead schedules and reports, improving visibility into upcoming activities and reducing coordination delays across project teams by improving schedule alignment and execution efficiency

Coordinate with engineering, procurement, and site teams across multi-disciplinary projects, including transit project environments involving cross-functional teams, resolving sequencing conflicts and maintaining execution flow

Collaborate with project managers and stakeholders, ensuring schedule updates accurately reflect site progress and priorities

Support evaluation of schedule changes and delay impacts, contributing to recovery planning and schedule adjustments

Integrate cost, schedule, and resource inputs, improving performance tracking and supporting early identification of schedule variances for corrective planning decisions

Project Scheduler / Planner Saytal Sakht Co., Tehran, Iran | September 2017 – April 2022

Developed baseline schedules and WBS structures using Primavera P6 and Microsoft Project for multi-phase projects, including transit and construction project environments, supporting planning and execution across project phases

Performed weekly and monthly schedule updates, maintaining consistency with baseline plans and supporting forecasting accuracy

Prepared progress reports, lookahead schedules, and action plans, improving coordination across multi-disciplinary project teams, including transit-related teams, and enhancing reporting efficiency and execution consistency across project phases

Conducted delay analysis and variance assessment, identifying root causes and supporting development of recovery plans

Ensured compliance with project planning processes, documentation standards, and scheduling frameworks

Monitored project performance and milestone progress, supporting schedule tracking and reporting consistency

Collaborated with project managers, engineers, and site teams, aligning schedule updates with field execution

Evaluated performance against timeline and budget targets, supporting overall project delivery and reporting activities

EDUCATION

Master of Engineering in Industrial Engineering University of Windsor | Windsor, ON | May 2022 – August 2023

Bachelor of Science in Industrial Engineering Khayyam University, Mashhad, Iran | August 2009 – September 2013
